## PROJECTS

---

juev/juev.org – sources from my site  
juev/prometheus\_oracle – prometheus oracle database exporter  
juev/ok – .ok folder profiles  
juev/t – a command-line todo list manager for people that want to finish tasks, not organize them  
juev/vim-sensible – fork of tpope/sensible.vim: my own defaults  
juev/vim-hugo – vim-plugin for creating new blog-posts on Hugo  
juev/jekyll2hugo – migrating jekyll posts to Hugo  
juev/russian-mac – emacs keymap for Russian  
juev/link-checker – simple program on C++, Golang and Rust for checking weblinks  
juev/fortune-go – fortunes program on Golang  
juev/go-create – template for golang programs  
juev/sms-send – simple application for sending sms messages across smpp connection  
juev/go-passgen – password generator  
juev/test-tcp – test tcp-connections on Golang  
juev/terminal-pomodoro – simple application for pomodoro timer  
juev/debian-ikev2-vpn-server – IKEv2 VPN Server on Debain, with .mobileconfig for iOS & macOS  
juev/cpp-make-project – program template for C++ applications  
juev/jekyll2pelican – golang program for migrating jekyll posts to pelican  
juev/vim-jekyll – vim-plugin for simplifying writing jekyll posts
